

FSB – Java Developer

A highly skilled Java Developer is required to join a small team of programmers and designers producing innovative sports betting products in central London. The ideal candidate will have direct experience of the betting and gaming industry. Experience of working with high transactional distributed systems and data feeds is essential.

An intimate knowledge of the following will be required for the role:

- Core Java 7/8
- Java EE Technologies; EJB, JPA, JTA, JMS, CDI
- Good knowledge of one or more application servers (e.g. JBoss/Wildfly, Weblogic, Glassfish)
- Spring
- SQL

Any knowledge of the following would be highly beneficial:

- NoSQL databases (e.g. MongoDB)
- In-memory data grid technology (e.g. Apache Ignite / GridGain)
- Web Technologies (e.g. JavaScript, HTML/CSS, Ajax, Websockets)
- Apache Camel, Karaf
- Git, Maven, Gradle
- Jenkins
- Vagrant

The candidate will suggest, integrate and reuse these technologies effectively to maintain a robust platform capable of scaling to the demands of customer growth.

Ideally the candidate should also have a Graduate or Postgraduate science degree with final grade of 1st or 2:1 from a reputable university.

FSB Technology (UK) Ltd is a privately funded company that provides sports betting and casino products. More information about FSB can be found at <http://www.fsbtech.com/>.
