

Frontend Developer

A highly skilled Web Developer is required to join a technical team producing innovative sports betting products in central London. Experience of working in the Betting / Gaming industry would be highly beneficial for this role.

The ideal candidate will be joining and collaborating with an existing multi-tasked front-end team and will work across different areas and stages of web product development; e.g. understanding business requirements, JavaScript development, writing unit and integration tests, verifying in staging and production.

Despite being a technical role, the candidate should also be willing to bring ideas and insights and to participate in the proactive research and development being performed by the team.

The successful candidate will need all the following attributes and skills:

- Passionate about creating solid websites that exceed expectations
- Able to demonstrate a portfolio of scripts / previous work
- Good JavaScript ES6 specification knowledge
- Some understanding of Jest or another JavaScript Unit Tests
- Frameworks
- Comfortable using GIT based version control systems
- Aware of JavaScript bundler processes (CommonJS, AMD, ES6)
- Practical experience in building mobile oriented websites
- Exposure to SEO considerations and Conversion/Retention Pixel based tracking systems.
- Extensive understanding of browser capabilities

Bonus Skills:

- SEO commercial experience
- Experience with mobile web oriented technologies experience
- Experience writing Integration Tests / UI Tests

Although not essential, design skills would be beneficial.

FSB Technology (UK) Ltd is a privately funded company that provides sports betting products. More information about FSB can be found at <http://www.fsbtech.com/>.
