UAT Analyst – Igaming

£26,000 - £28,000 per annum

We aim to place the customer experience at the heart of our business. The UAT Analyst is responsible for ensuring an exceptional online customer experience through managing the business test and sign off process and assisting in the transition of releases into the live environment and ensuring the correct test process is carried out and reported on.

We are looking for a proven test analyst to join our growing team who will undertake the required testing to ensure that the service delivered meets business requirements. You will be someone who enjoys a collaborative environment, who will support the Business Analyst in delivering a full test service and maintain a close relationship to clarify requirements with both CMS, Operations and Product owners, ensuring a quick testing turn around.

(UAT) User Acceptance Test Analyst - What you will be doing:

Responsible for testing and supporting the Content Managers (CMS) for all content changes that are ready for UAT, creating UAT l Change requests, writing up defects and ensuring all requirements are correct at all times
To report issues relating to layout, alignment, spelling, grammar, functionality, URL inks, consistency along branding are to be reported to CMS and the Product owner sand chased for rapid resolution due to the quick timescales.
Responsible for working with multiple third party test service providers and testing at their site when required
Produce test plans, test conditions, detailed test scripts, UAT exit reports, daily status reports
Have clear track record documentation during test execution for test evidence
Assist in the creation and sign off of robust test plans to ensure quality is maintained

(UAT) User Acceptance Test Analyst - to be successful in this role you will need to have/be:

Experience and proven success in a similar role
Browsers and Mobile device knowledge (Essential)
Experience of front end usability testing / Web & Mobile testing (Mandatory)
Full understanding and experience of UAT
Experience of the software testing lifecycle (Mandatory)
Experience of working with various types of testing techniques and methodologies in particular, Waterfall and Agile
Experience in testing Payments gateways
