

Frontend Developer

An experienced and knowledgeable Frontend Developer is required to join our frontend team producing innovative sports betting products in Old Street, central London.

Experience working in the Betting / Gaming industry would be beneficial but not a must. The ideal candidate will be joining and collaborating with the existing front-end team.

You will work across several different areas and stages of web product development:

- **Understanding business requirements**
- **Debugging**
- **JavaScript development**
- **Writing unit and integration tests**
- **Verifying in staging**
- **Deployment and verification in production environments**

The successful candidate will need experience with these frameworks:

- **Marionette.js**
- **Backbone.js**
- **Sencha - Ext JS**

The successful candidate will need all the following attributes and skills:

- **Frameworks (as listed above)**
- **Confident developing solid websites that exceed clients expectations**
- **Able to demonstrate a portfolio of scripts and previous work experience**
- **Good JavaScript ES6 specification knowledge**
- **Some understanding of Jest or another JavaScript Unit Tests**
- **Comfortable using GIT based version control systems**
- **Aware of JavaScript bundler processes (CommonJS, AMD, ES6)**
- **Practical experience in building mobile oriented websites**
- **Exposure to SEO considerations and Conversion/Retention Pixel based tracking systems.**
- **Extensive understanding of browser capabilities**
- **Debugging experience**

Bonus Skills:

- **SEO commercial experience**
- **Experience with mobile web-oriented technologies experience**
- **Experience writing Integration Tests / UI Tests**

Despite being a technical role, the candidate should be willing to bring ideas and insights forward. You will also participate in ongoing proactive research and development performed by the team.

Not essential but design skills always appreciated.
