

## **FSB - Front-end Team Manager**

A highly technical and inspirational manager is required to lead FSB's front-end team. The ideal candidate will have worked as a lead JavaScript / Web developer and have extensive management experience. Experience of working in the Betting / Gaming industry would be highly beneficial for this role.

The following skills will be essential for the role -

- Line management - provide leadership and day to day of management to current team of 15 (JavaScript engineers, web developers, designers, iOS developers).
- Project management - liaise with stakeholders to communicate progress, manage expectations and help prioritise delivery. Ensure team members have all the necessary support to do their jobs effectively.
- Strong technical skills - solid understanding of best practice needed to build efficient and fast modern web based applications.
- Operations - ensure production content stays bug free, delegate and own critical issues through to resolution.
- Releases - help coordinate and communicate regular releases to all key stakeholders, both internal and external. Ensure release schedule is timely and causes minimal disruption.
- Recruitment - write job specifications, review applications and interview. Continue to grow a strong team of highly capable individuals that can deliver to the needs of the business.
- Brand - oversee creative content and design (e.g. marketing materials, trade shows, corporate website) to ensure FSB's brand maintains a clear and consistent identity.
- Providing inspiration - encourage the development of new skills and best of breed technologies to ensure FSB maintains its place in the industry providing innovative and cutting-edge products.

FSB Technology (UK) Ltd is a privately funded company that provides sports betting products. More information about FSB can be found at <http://www.fsbtech.com/>.
