

UX/UI Designer

FSB is looking for an experienced UX/UI Designer to create both functional and appealing features for our partner sites as well as driving improvements to the existing product. FSB has a wide range of clients operating in the competitive online betting marketplace. As a UX/UI Designer you will be working closely with product owners, developers and partners to make sure we deliver a consistent user experience across our different platforms (Web, iOS and Android).

Responsibilities:

- Own the design process for FSB's products
- Work with product owners and partners to create prototypes
- Ensure consistency between partner branding and product
- Manage FSB's design system
- Collaborate effectively with developers on supplying guidelines and assets
- Conduct user research and incorporate user feedback into design concepts
- Keep up to date with the latest design trends

Requirements:

- 3+ years' experience with UX/UI design
- Knowledge of the sports betting industry
- A strong understanding of user interface design and best practices
- Understanding of iOS-specific requirements
- Highly confident in UX/UI tools (XD, Sketch, Axure)
- Excellent communicator
- Highly organised and proficient at project management
- Able to work within brand and design guidelines
- Confident in presenting ideas
- Strong portfolio which shows experience with a range of programs

Desirable:

- Experience with HTML and CSS
- A passion for sport
- Previous experience in sports betting app design
