

Business Intelligence Analyst

As Business Intelligence Analyst, you will be responsible for helping to develop, maintain, monitor, and support our core reporting platform. This role will work together with our existing IT and development departments to help automate and streamline reporting processes. You will be responsible for assisting with internal and external data / reporting requirements, often liaising with stakeholders to ascertain their needs in order to provide a solution.

This vacancy provides a great opportunity for a driven individual to help contribute, improve and shape our current and future data analytics tooling and processes.

The right individual must be prepared to work core hours of 09:00 until 17:30 Monday to Friday. At FSB we provide 24/7 service, so flexibility will be required for releases and on rare occasions support outside of these core hours.

Responsibilities:

- Transforming client business requirement into optimal data solutions while adhering to best practice with high level of attention to details.
- Extracting data from PostgreSQL databases with good optimisation techniques to speed up query execution.
- Developing JasperReport per requirement.
- Design, implementation and maintenance of database extracts and load processes using Shell Scripting.
- Building of aggregate tables for common operations. Dimensional modelling.
- Communicating with external and internal stakeholders via Salesforce & Jira.
- Cross-functional collaboration to fulfil joint change request assignments.
- Set up real-time data pipeline using Kafka/Clickhouse.
- Create dashboard visualisation using Grafana.

Desirable:

- Linux shell scripting.
- Kafka.
- ClickHouse.
- Visualisation tools, preferably Grafana.
- Jasper reporting software
- Gaming Industry experience

Please submit your resume via the FSB website:
