

Senior iOS Developer

As a Senior iOS Developer you will be working on building and maintaining both new and existing iOS apps. The successful iOS developer will be expected to:

- Analyse and design new features with the help of your lead
- Code in both Swift and Objective-C following FSB standards
- Unit test any new or existing features
- Communicate using FSB's communication channels (JIRA, Discord, Emails) about progress
- Pair programming and code reviews
- Proactive approach to continuously improve FSB apps
- Collaborating with FSB's employees and external partners to fulfil assignments

FSB having its dedicated first line support, part of your responsibilities is to be a support reference by providing a second line coverage.

Requirements:

- 4+ years commercial experience of iOS Development in Swift
- Working experience with Objective-C
- Experience in Unit Testing
- Experience working with REST API calls and JSON
- Good understanding with MVVM or other iOS architectures
- Git
- CocoaPods

Desirable:

- Fastlane
- UI Testing
- TDD
- Web sockets
- Xcode Instruments
