

# Technical Lead

FSB is looking for a talented Tech Lead to contribute to the development of the FSB platform. FSB has a wide range of clients operating in the competitive online betting marketplace.

## Responsibilities:

- Leads the onboarding of project teams
- Solve the team technical challenges
- Ensure best practices and processes are followed by the team
- Builds constructive working relationships / partnerships with client sponsors, product owners / key stakeholders and team members, facilitating strategic and execution alignment
- Owns and communicates the cadence for internal and client-facing ceremonies.
- Attends team ceremonies (daily stand up, backlog refinement, sprint planning, demos, retrospectives)
- Oversees sprint planning to validate priorities and approach, ensuring work items are represented and tracked correctly in JIRA
- Ensures sprint team following clean coding principles and that the appropriate documentation is provided to the client.
- Manages resourcing conflicts and bottlenecks both within the sprint teams and with client counterpart teams.
- Facilitates and manages risks, blockers and dependencies, escalating internally or to the client when required.
- Leads the client steering committee and is responsible for all content presented
- Embeds a culture of continuous learning and improvement within the scrum team(s) team, with client counterpart teams and across the delivery team ecosystem
- Looks for opportunities to increase client engagement

## Requirements:

Our successful candidate will have in-depth experience in delivering projects using Agile frameworks (including SAFe). A background in software delivery and detailed knowledge of the SDLC is necessary. CI / CD and DevOps awareness is an advantage. Evidence of leadership and senior stakeholder management is also required from previous team, project and programme management roles.

Values & behaviours include:

- Lead by example, ensuring you embody the companies values and behaviours
- Lead and facilitate communications with engagement team members and across the wider delivery teams
- Support the delivery of high-quality products and services

### Desirable:

- Tools experience with: JIRA, Azure DevOps, other portfolio management tools, CI/CD component awareness
- Frameworks experience: Agile, Kanban, Scrum, DevOps, DevSecOps awareness, Waterfall

Please submit your resume via the FSB website:
