

C# Developer

Hours: Full Time, 37.5 hours

Contract: Permanent

Location: Hybrid, Central London / Remote (here's our [office](#))

About the company

FSB is one of the leading platform providers in the Sports Betting and iGaming sector. With an ever-increasing client base spanning across various countries and continents, you'll be joining us at an exciting time as our company grows and our journey accelerates rapidly in continuing to achieve great success. Will you be the next member of Team FSB? Develop your dream role and bet on us!

About the role:

As a C# Developer you will be working on developing FSB's retail betting product. The product is deployed onto both SSBT (Self-Service Betting Terminals) and EPOS terminals (Electronic Point of Sale). The application has many complex user interface components implemented with complex WPF (Windows Presentation Framework) structures, therefore, it is essential that you possess a good understanding of this specific technology, as well as API consumption and backend development. This role will primarily be a home based position, with travel to the FSB office several times a month. Some travel to vendor and customer sites may be required on limited occasions to support assignments. In this role, you will help deliver a high-quality retail betting application by:

Responsibilities:

- Writing efficient code following FSB's high standards and have code reviewed
- Supporting the senior Retail Developer to fulfil assignments with line management into the Retail Delivery Manager.
- Working with other developers within the business (both C# and platform developers), Business Analysts, Project Managers, UI/UX Specialists and QA Testers, plus third party vendors
- Helping the team to estimate work, support the testing phase and support launch activities
- Demonstrating a proactive approach to continuously improve FSB's retail product
- Assisting with any other reasonable tasks within the context of the role/team/department as specified by the line or authorised manager.

Essential Requirements (must have):

- C# (3-4yrs minimum)
- .NET (3-4yrs minimum)
- WPF / XAML (2-3yrs minimum)
- MVVM Design Pattern (2-3yrs minimum)

- Asynchronous programming (async/await knowledge - 2-3yrs minimum)
- LINQ (Language Integrated Query)
- REST/JSON
- Git
- Ability to work both in Agile and Waterfall delivery methodologies and with legacy and new technologies.
- Have some experience of working in the retail space around EPOS systems and with hardware integrations

We would be keen to see if your talent matches our requirements. Please submit your interest via our website: <https://fsbtech.com/careers/>

Disclaimer: Please note that FSB currently does not have a licence to sponsor anyone who does not have the right to work in the UK.
