

Release Manager

Hours: Full Time, 37.5 hours

Contract: Permanent

Location: Hybrid, Central London / Remote (here's our [office](#))

About the company

FSB is one of the leading platform providers in the Sports Betting and iGaming sector. With an ever-increasing client base spanning across various countries and continents, you'll be joining us at an exciting time as our company grows and our 006Aourney accelerates rapidly in continuing to achieve great success. Will you be the next member of Team FSB? Develop your dream role and bet on us!

About the role:

As a Release Manager, you will be primarily responsible for the management and protection of releases and where appropriate, Build/Develop, QA, UAT, Pre-Prod and Production environments across the Digital estate. We need people who are keen to learn and find new ways of doing things and team players who are proud of their work and want to help others flourish. If you like working in a fast-paced environment, driven by a desire to improve your capabilities, our services/offers and keep up-to-date with the latest technologies then this could be the role for you. We offer flexible/Hybrid working in our London office.

Responsibilities:

- Negotiating, planning and managing all release activities.
- Analysing risks and resolving issues that affect release scope, schedule and quality.
- Working cohesively with external partners, suppliers and product owners.
- Developing common strategies for release governance across multiple systems
- Communicating release details and schedules to the Business as required.
- Act as guardian to uphold the integrity of the branching strategy and ensure processes are optimised to enable frequent and smooth releases
- Know and understand impacts of branches and code merges in the repositories used by the dev teams.
- Work with third party managed-hosting providers to increase automated processes end-to-end
- Work with the development teams.
- Coach and help automate release processes.
- Inform senior management of enterprise-wide exposure to release risk and effectively mitigate it
- Create, track and maintain a published enterprise-wide release and deployment calendar.
- Know the tech stack of the development process so you can participate and discuss with the development teams the challenges of the full delivery workflow. A core background in eCommerce technologies is a must.
- Maintain release documentation and manage key information such as build and release procedures, dependencies, and notification lists.
- Work with Infrastructure teams to improve a process, pass awareness of potential problems risks and oversee that the process is fit for the Release process needs.
- Work closely with Project Management to ensure the efficiency of the delivery of Programs

and Projects (Control, Plan, Measure, Predict and React).

- Work with Service Management in the Post-Mortem analysis and improvements identification.
- Understand Infrastructure where applications will be deployed, different technologies for alarms, secrets management, geo-distribution, load balancing, containers. This way you should build bridges between the product delivered and Infrastructure that supports it. X
- Assist with any other reasonable tasks within the context of the role/team/department as specified by the line or authorised manager.

Essential Requirements (must have):

- Knowledge in DevOps related Release Management
- Knowledge in software development, preferably on web (E-commerce) sites.
- Knowledge in software build, repository and maintenance tools like Jenkins, GitLab or any other automation build and deployment tools.
- Experience in agile environments with SCRUM methodologies.
- Passionate about delivering quality software and defending the customer/end-user perspective.
- Good communication skills and teamwork believer.
- Strong time management & organisational skills.
- Interested in automating things.
- You like to learn and investigate new technologies that the company is working with or will work in the future.
- Experience in Continuous Integration, Delivery, Deploy methodologies.
- Excellent negotiation skills and an ability to handle sensitive issues with tact and diplomacy.

We would be keen to see if your talent matches our requirements. Please submit your interest via our website: <https://fsbtech.com/careers/>
